

Assembly Engineer

Do you have the talent and drive to bring an existing product, in a new form, to the market? Then we are looking for you!

Widemex International B.V. is a family business that specializes in the design, manufacture and sale of ironing board covers and related accessories. They supply nationally and internationally under well-known brand names to well-known retailers and suppliers in the E-tail.

A team of 130 passionate employees, spread over several international locations in the Netherlands, France and Poland, is committed to delivering high-quality products every day.

What will you do as an Assembly Engineer

For this vacancy as Assembly Engineer you start from the "drawing table". Together with the designer of the end product, you will assemble the components. You will then define and implement the assembly process with the aim of achieving the right product quality, short lead times and low costs. Developing related tools such as assembly and control materials. Also drawing up necessary work instructions to support and guarantee the assembly process.

You are engaged in the following challenge:

- Sourcing raw materials.
- Research, audit and selection suppliers.
- Research, audit and selection of sub-contractors.
- Preparing and supervising the assembly production of a new design.
- Drafting process documentation and work instructions.
- Determining and implementing required assembly tools. Designing and supervising the production of assembly tools where necessary.
- Identifying problems, risks, bottlenecks in the assembly process.
- Implement assembly process in the organization.
- Establish and maintain contacts with suppliers.
- Instruct, support and/or carry out maintenance activities yourself.
- Being and staying abreast of relevant developments within the field and taking adequate decisions based on these developments.

Your profile?

- Work and thinking level at Higher Professional Education(mechanical engineering training)
- Work experience (minimum 2 years) in assembly engineering is a must.
- Able to read technical drawings and diagrams.
- Knowledge of the nature and use of tools and machines.
- Positive thinking with a problem-solving attitude
- Goal-oriented Team Leader as well as a good Team Player.
- Knowledge of operation and operation of measuring tools.
- Command of the English language in word and writing;
- If you have good knowledge of one or more European languages, this is an advantage.

Specific job features

- Social skills, for dealing with colleagues in various branches of the organization as well as with suppliers and potential customer representatives.
- Oral and written expressiveness for giving and drawing up work instructions, conducting conversations with suppliers/customers and conducting correspondence.
- Expert in the following Software's: Solidworks, AutoCAD for example.
- The ability to function independently, with initiative and flexibility and to act as an authority.
- Willingness to travel.

Personal characteristics

- Enterprising
- Initiative
- Hands on
- Getting things done
- Subject-oriented
- Creative
- Listen/give feedback

Widemex International offers you

A full-time position in a beautiful organization that is characterized by an atmosphere of enthusiasm. Entrepreneurship is valued. The internal communication is informal and the lines are short, so that you can switch quickly.

We offer you an appropriate salary depending on your education and experience
You start with a temporary contract which will be converted into a permanent contract after a while, if we are both satisfied.
